

NEW

TRAFFIC BARRIERS

HARRIER series with built-in flashing light and new TRAFFIC 230 electronic control unit.

APRIMATIC presents **HARRIER LUX**, its top-of-the range model of **APRIMATIC** traffic barriers for continuous use featuring a new design with **cover and built-in flashing light**.

The **new HARRIER LUX barrier** is suitable for beams up to 4,5m with 90x25mm profile and 6 m long with Ø 80 profiles).

But the new HARRIER series offers much more!

All HARRIER models are supplied with the innovative TRAFFIC 230 control unit ensuring the following important functions:

- Master/slave function;
- Built-in radio receiver;
- External memory to download radio controls and control unit parameters;
- Traffic light function;
- Cycle counter with maintenance indication;
- Photocells test and safety device for each manoeuvre;
- Advanced slowing-down management;
- Connection to Park systems available.

NEW

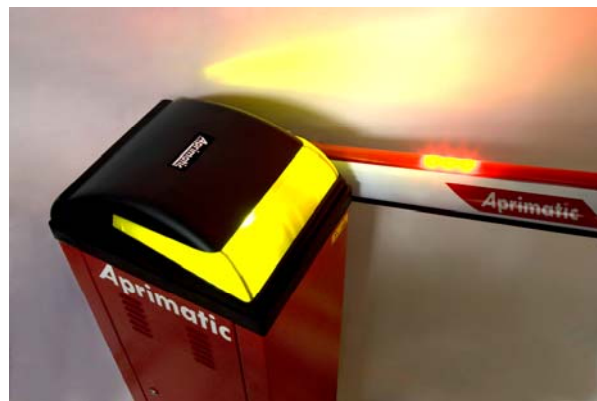

TRAFFIC BARRIERS

HARRIER LUX will be also available without electronic control unit.

Both traditional **HARRIER** models and new **HARRIER LUX** model featuring **TRAFFIC 230** electronic control unit will be available for sale from February 2010.

Note: the codes for **HARRIER** models without built-in flashing light and fitted with new **TRAFFIC 230** electronic control unit will remain the same as the previous models with T5SB control unit.
